

## Configure a Segment to Appear on the GL Impact Page

In some cases, you may want to apply segments to transactions. You can apply segments to the body of a transaction or make them columns in a transaction sublist. In both cases, you can configure these segments so that their values appear on the GL Impact page for the transactions where they are used.

GL Impact												Return to Invoice #3
												TOTAL: 2
ACCOUNT	AMOUNT (DEBIT)	AMOUNT (CREDIT)	POSTING	MEMO	NAME	SUBSIDIARY	DEPARTMENT	CLASS	PRODUCT LINE	PROFIT CENTER	SALES CHANNEL	SALES REGION
1100 Accounts Receivable	165.00		Yes		Anonymous Customer	Parent Company	Women's	Full-Priced	Winter 2015-16	Clothing	Web Store	Denmark
4000 Sales		165.00	Yes		Anonymous Customer	Parent Company	Women's	Full-Priced	Winter 2015-16	Clothing	Web Store	Denmark

For custom segments that have GL impact, the Custom GL Lines Plug-in can set and read custom segment values from custom and standard lines and from transaction records.

For more details, see [Configuring GL Impact for a Custom Segment](#).

Also, see [Benefits of Custom Segments](#).
