

Enabling Serial Numbered Inventory

An administrator can use the following procedure to enable the Serialized Inventory feature.

To enable the Serialized Inventory feature:

1. Go to Setup > Company > Setup Tasks > Enable Features.
2. Click the **Items & Inventory** subtab.
3. Check the **Serialized Inventory** box and the **Inventory** box.
4. Click **Save**.

You must create new inventory items to track serialized inventory because you cannot convert existing inventory items into serialized items. For more information, see [Creating Item Records](#).
